

To all our valued customers

We have been monitoring the situation with Covid-19 closely over the last few days and have decided to make our show site at Bridgend open by appointment only to reduce the number of people viewing our cabins at the same time. Our Dublin site is currently closed and won't be taking appointments until further notice.

Our office staff are still working 7 days a week remotely and are available for queries, processing orders and booking appointments via telephone and email. We are not closing as it stands but are following government advice closely and will update if any changes occur.

If you would like to make an appointment please call us on 074-9368972 or email sales@beaverlogcabins.ie

It is also of huge importance to us that we are able to fulfil our commitment to delivering and installing a quality product. We will be in constant communication to our customers and if you have your installation booked for the next few weeks please give us a call to discuss as there are travel restrictions in place and we do not wish to come into contact with vulnerable people. The health of our staff and customers is of the utmost importance to us during these times.

In the unlikely event that any of our fitting staff should report to our office with Covid 19 Symptoms, we will contact any person to whom they may have had contact with while fitting our products to advise them to self-isolate.

We ask that during this time that if you have been in contact with anyone with COVID-19 please notify us and we will make alternative arrangements also that you remain a distance of 2m at all times from our fitters. In the event of a full scale lock down which will see all of us having to cease work, all orders will be fulfilled in the same time frames as agreed but unfortunately the closure time will be added to the original timelines.

We hope all our customers stay safe and healthy over the next few weeks

The Beaver Log Cabin family.
